SELECTBIO's Academic Drug Discovery 2015, Cambridge, UK, will be a progression from our successful academic discovery events in the USA. Creating a European platform to bridge the gap between basic research and commercial application for innovative technologies. With talks from global experts on partnering models between both industrial and academic organizations that have successfully contributed to modern medical interventions.

**Keynote Speakers:**

– Stephen Frye  
  Director of The Center for Integrative Chemical Biology and Drug Discovery, University of North Carolina  
– Marcie Glicksman  
  Co-Director, Harvard NeuroDiscovery Center and Brigham and Women’s Hospital

**Agenda Topics:**

- Drug discovery technology transfer
- European lead generation and enabling open innovation
- Novel approaches across different therapeutic areas
- Partnering models for academia and industry
- Professional translational research

The agenda is available to view online.
