

We invite you to attend the Antibody Drug Conjugates Conference, which will take place October 22-23, 2015 in Boston, MA. This event will bring together an exciting balance of industry and academia, so that delegates have the unique opportunity to network with colleagues from different sectors and gain a fresh perspective on the emergence of recent data from ADC clinical trials, new linkers and payloads, personalized healthcare, site specific attachment, and ADC therapeutics.

With the field of antibody drug conjugates rapidly expanding and the increasing number of ADC clinical trials, novel therapeutics are emerging. The ADC therapeutic area combines synthetic chemistry with rationale biology and is advancing monoclonal antibody treatments into the realm of precision medicine with improved effectiveness and therapeutic indices.
