

On behalf of GTCbio and the 2016 Advisory Board, you are invited to the CRISPR & Genome Engineering Conference which takes place May 26-27, 2016 in Boston, MA. This meeting is part of The Genomics & Big Data Summit and will bring together an exciting balance of industry and academia, so that delegates have the unique opportunity to network with colleagues from different sectors and discuss the most recent advances in CRISPR & Genome Engineering.

Leading researchers will present on hot topics such as: therapeutic applications of CRISPR and genome engineering, discovery and mechanisms of CRISPR systems, and will discuss updates on current CRISPR technologies and techniques. In addition to scientific talks, dedicated networking sessions will allow attendees to better dialogue on how CRISPR & Genome

Engineering will continue to impact biomedical research.

Sessions include:

- I. Therapeutic Applications of CRISPR & Genome Engineering
 - II. Advances in CRISPR-Cas9 Specificity
 - III. Discovery and Mechanisms of CRISPR Systems
 - IV. Update: Current CRISPR Technologies & Techniques
 - V. CRISPR Regulation of Gene Expression
- We look forward to seeing you at the conference!

Conference Dates: May 26-27, 2016
