

Agilent Bio MAb is specifically designed for high-resolution monoclonal antibody separations. Agilent Bio IEX ensures high-resolution, high-recovery and highly efficient separations of proteins, peptides, oligonucleotides and other bio-molecules. Agilent Bio SEC-3 and Agilent Bio SEC-5 enable sharper peaks and faster size-based separations and/or improved peak capacity for bio-molecules and water-soluble polymers. Learn more, and request your free Agilent BioHPLC Columns Navigator Poster at agilent.com/chem/biohplc.
