Privacy

We are strongly committed to safeguarding privacy on this Web site. We operate under the following set of strict privacy principles: The only information we obtain about our users, is to be used for contact purposes. This information is never resold, or given to third parties.

External Links

In order to provide visitors with greater value, we provide links to various third party web sites. We do not take any responsibility for the content of these sites. However, keep in mind that many sites do attempt to capture visitor information when you browse those sites. Once you leave our site, we are not able to alert you should another site attempt to gather information from your browser.

We do not have any control over the content of other linked websites. We can not be held responsible for any harm or losses incurred after using BioScreening.com or visiting linked websites.

Link Addition and Removal

BioScreening.com is dedicated to provide its visitors with most comprehensive information about vendors of compounds, compound libraries, building blocks, combinatorial chemistry libraries, HTS equipment, custom synthesis, lead optimization, and services that support drug discovery in the pharmaceutical and biotechnology industry. BioScreening.com also provides advertising opportunity to maximize vendors' exposure to potential customers. Company profiles and web links are added for a nominal listing fee. To add a link to BioScreening.com, please [submit your company information and payment](#), send us your name, address, link title, appropriate category name and company description. To remove a link, please send us your contact info, the link title and reason for removal. Media companies please visit our [partner section](#).
